# January 2022

Investment specialists of the Ethos Foundation assessed Swiss SMI companies on their corporate digital responsibility.

The best company achieved just 39 points out of 100.

It is time to change it.

Contribute to reducing  
Digital technology  
Environmental footprint

Digital Responsibility  
Code (DRC)

Transparency among  
stakeholders on  
Digital Practices and  
Footprint

Ensure fair  
and responsible  
social  
transition

# 7 Ethos Criteria for Digital Responsibility

Highest data  
protection  
and  
processing  
standards

Prevent sensitive  
digital activities

Ethical Principles  
on the use of AI

Ethos Engagement  
Paper: [Corporate digital  
responsibility](#), Nov. 2020

# Why Digital Corporate Responsibility

- Demands by consumers and regulators with regard to digital responsibility are increasing.
- Digital responsibility is the new dimension of CSR in the digital age.
- Empowering companies – staff, leadership and partners – to contribute to a fair society.

How to get your company on track for  
the next round of evaluation ?

What we offer

Ethical assessment of  
an HR data tool

How to define  
ethical criteria and  
assess digital tools?

We conducted an ethical  
assessment of an HR-  
tool – combining data  
sciences and applied  
ethics. More on our [blog](#)

Mapping the existing label and guidelines on digital trust

Understanding digital trust?

On behalf of the Swiss Digital Initiative, we mapped and evaluated the main product labels on digital trust.
